

Baloch Nationalism and the Geopolitics of Energy Resources: The Changing Context of Separatism in Pakistan

The author examines the energy context of the simmering Baloch separatist insurgency that has surfaced in recent years in Pakistans sprawling Balochistan province. In particular, he looks at how Pakistans mounting energy insecurity-a product of rapid increase in demand coupled with rising scarcity and the regions intensified energy rivalry-has both magnified the economic and strategic importance of this province while at the same time complicating Pakistans efforts to cope with the provinces resurgent tribal separatism. The author concludes that Pakistans government needs to overhaul its counterinsurgent policies to avoid protracted conflict and to enlist the Baloch as partners in energy development, not antagonists of it.
