

## The Untold Story of Indian Reforms 1991-2016

No power on earth can stop an idea whose time has come. India began the quest for a free and open economy in 1991 while remembering the powerful quote of Victor Hugo, a series of brave measures of liberalisation and promise of reforms with human face. It was the historic moment India ended forty-four years of closed, government-planned economic experimentation with a humbling recognition that none of the old socialist shibboleths mattered to truly modernise the economy to shed the inferiority complex. India has changed in ways unimaginable in the last 25-years and the momentum favoured economic liberalisation. For those who have lived long enough under the oppressive licence-permit-quota-raj era, it would be grotesque to even compare the pre- post-economic liberalisation India. Neither would have modernity washed the shores of India the way it has nor would the country have found self-confidence and social justice the way it has, if not for the post-1991 economic reforms. The sequencing of the economic reform process after 1991, is described in this book vividly; and, with a personal touch. In its brisk history telling, one shall encounter ringside view of important personalities who orchestrated the reforms that brought millions and millions of people of India to a better and rewarding life and some key lessons missing in the history telling elsewhere, without which the recount of the reforms would never be complete.
