

## Debt Capital Market: Russian Experience

The monograph, based on a practical experience of the author, is focusing on the basic instruments of the Debt Capital Market (eurobonds, syndicated loans, securitization of assets, convertible bonds, ECP and foreign trade debt instruments). The work covers both theory and practice of the most popular financial instruments applied by the different types of borrowers (first of all, from Russia) in the DCM. Special attention is paid to completing a legal documentation related to various deals in the DCM. The book can be of interest to a wide range of readers (including students in world economy and finance).
