

The Earthscan Reader in Business and Sustainable Development (Earthscan Readers Series)

The Earthscan Reader in Business and Sustainable Development builds on the success of The Earthscan Reader in Business and the Environment. This exciting new volume brings together a selection of recent seminal writings on the topic by the leading thinkers in the field. Covering both the environmental and social aspects of sustainable development, the Reader provides various perspectives on what business is (and is not) doing, could do and should do to contribute to society's transition to a sustainable future. Following an opening general section on the theme of business and development, the Reader continues with sections on: the Porter debate regarding the prevalence of win-win business opportunities; the Greenwash debate, on social accounting; and TNCs and trade
