

The Division Of Time BubbleGum Version

All of earths past history has been tampered with by a time traveling evil future society. The time contamination becomes so rampant that units made up of the evolutionary halfway point between present man and the farther future earthmen, that we think of as skinny grey aliens, are sent to oversee and destroy the flagrant abuses. The story so far is funny, but also very eerie, and it also has a very plausible speed of light travel theory in it, this version only has one backup story, Zingara. Its in full color and easily readable, broken down into individual panels. I call this the bubblegum version, because I was able to compress it into under 2 megabytes, and can now charge less than the mandatory 3 dollars for it! It still looks great though, and has a table of contents to help navigate through it all. If you like this, try out the 3 dollar higher quality version.
